

Regain Your Energy, Strength and Focus!

One of the best theories on aging states that “mental and physical decline with aging directly follows decreasing hormone levels.”

Hormones are the potent chemical messengers produced by glands in our bodies that regulate circulation, blood sugar, blood pressure, sexual function and maintain our brain. As we age, our hormone production decreases. Muscle mass is lost. Many say this is an inevitable and irreversible effect of aging. Yet, we wear glasses and correct our age-related vision problems. Why not correct our hormonal decline also?

Just as glasses help us regain our focus and visual clarity, Hormone Replacement Therapy (HRT) with bio-identical hormones, (exactly the same as our bodies produce), helps us regain our focus and interest in life itself. A robust, energetic feeling occurs when low hormone levels and imbalances corrected back to levels of youth.

We offer three incredible HRT therapy programs to help you “Get back to your life™”

About Our Three Hormone Replacement Therapy Programs...

Who Qualifies?

Lab tests: blood, saliva and urine are used to determine which hormones are deficient and these results are used to customize a program tailored for maximum results. Bio-identical hormones are prescribed if the tests indicate a need.

Medical Insurance:

Medical insurance can be billed for hormone testing. Your insurance policy may or may not cover the cost of your HRT prescriptions and supplements.

Many insurance companies have little or no interest in your wellness and only will pay for illness! This is short-sighted in our view.

Three Different Levels of Intensity. The Choice is Yours!

Silver Level: Our Basic Plan

Includes:

Initial basic exam, EKG, evaluation of lab tests. Customized plan for HRT using: Testosterone and supplements*

Rx: Testosterone Cypionate*
Subsequent visits to ensure optimal results are required:
